

Water Efficiency Consultations

Large business and organisations

When was the last time you took a good look at the water use in your business or organisation?

It stands to reason that large businesses and organisations use more water than the average business in Darwin.

Depending on the industry, there may be more water intensive operations, more staff, a larger premises or a garden. In a large business, leaks can easily go unnoticed for months or even years.

In business, the water bill is usually something that gets paid without a second thought. Have you considered how you might reduce water use, saving extra cash for your business and improving your bottom line? Living Water Smart can help.

What we offer large business and organisations

Living Water Smart can provide eligible businesses, organisations and not for profit enterprises a Water Efficiency Consultation including:

- A Water Use Health Check to analyse water use in real time (via a data logger on your water meter).
- A comprehensive Water Management Plan.
- Advice on current water efficient technologies and practices.

Who is eligible?

To be eligible for a Water Efficiency Consultation your business must meet the following criteria:

- Be located in the Darwin region and connected to the town water supply.
- Have an ABN, an annual turnover of over \$75,000 and operating in the NT.
- Use at least 20 megalitres of water per year (Living Water Smart can let

you know your water use on enquiry). For organisations that use less than 20 megalitres Living Water Smart can provide a Water Use Health Check.

- As a Water Smart Champion, be available to participate in potential public promotion.

Water Efficiency Consultation process

- Contact Living Water Smart to find out if your business, organisation or not-for-profit enterprise is eligible.
- Once approved, a site meeting and Water Efficiency Consultation will take place.
- You will receive a Water Use Management Plan outlining quantified water saving recommendations and actions.
- We'll also let you know if you are eligible for a Living Water Smart Garden Tune Up rebate.

About Living Water Smart

In Darwin, we currently use more water than can be captured and supplied in the long term.

Living Water Smart is a Power and Water initiative that is helping residents, businesses and the government sector in the Darwin region to reduce water use.
